

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

I am a person who made less than eleven thousand dollars last year. It would be in my best interest to shut my phone off if this goes thru. Who would be responsible if something happened and i was unable to call for help? Think about it!!!! Profit margins for large corporations should not be put ahead of the American citizens

Keep the USF Fair!

Sincerely,

Paul Moak
